Dental Unit Water Line Testing Order Form

Phone Number (____) _____ - _____ Fax Number (____) _____ - _____

Contact person _____

Office Name _____

Doctor's Name:

(First) _____ (Initial) _____ (Last) _____

Address: _____

City _____ State _____ Zip _____

Email Address: _____

Number of Tests Requested*: _____

Special packaging instructions:** _____

(For example, if you are a multi-office practice, and you have 3 locations with four chairs in each office, we can package the tests 4 per return mailing box so that each office can collect and ship their own tests.)

Each order will contain:

- DOT approved return mailing box

- Leak-proof biohazard bag

- Security seal

- Labels to identify each sample (note unique ID number on each label), one per test requested

- Collection tubes with stabilization tablet, one per test requested

- Absorbent cushion material

*The ADA recommends testing each chair separately. Therefore, if you have six chairs, we suggest ordering six tests. Some rooms may have multiple water lines (ie: Cavitron and air/water syringe). We recommend testing the water line with the smallest bore tubing at minimum, usually the Cavitron or high speed handpiece, due to their tendency to become contaminated more easily than larger bore tube lines

**Unless otherwise specified, tests will be packaged in the smallest number of boxes possible, with a maximum of six tests per return shipping box

Invoice is enclosed with each shipment of testing supplies.

If you have any questions regarding the OML's DUWL testing service, please feel free to call us at (919) 537-3342, Fax (919) 537-3109 or email us at oralmicro@dentistry.unc.edu
